

Conceptboard On-Premises Overview

Your users get a simple, intuitive web interface for collaboration.
Your IT department gets data security and control.

Conceptboard Collaboration Benefits

Centralise visual collaboration activities in one place, and collaborate virtually as if you were in the same room. Real-time sessions and meetings, from anywhere.

Break down barriers between teams to reduce internal waste and lost productivity. See who's online, who's working on what, and keep everyone in the loop with @mentions, alerts & notifications.

Intuitive whiteboard tools allow for faster iteration with feedback “in-context”. Have a record of all of your team’s input stored in one place right next to your content.

Flexible workspaces centralise documents and discussions and reduce email overload. With our import and export options you can easily streamline Conceptboard into your existing workflows.

Manage projects with clarity and accelerate processes and product cycles. Save time on iterations with tasks assignments, activity feeds, and progress tracking.

Many Enterprise customers choose the Conceptboard Enterprise edition for secure cloud collaboration on their own dedicated instance. Customers with even higher privacy, compliance or regulatory requirements can choose the Conceptboard On-Premises solution. All the great collaboration features of Conceptboard, installed on your local network behind your firewall.

Store your data on machines you own and control, and choose the hardware that meets your specific performance needs.

EU and Swiss Safe Harbor or HIPAA compliance needs? With On-Premises you can adhere to your security and compliance requirements.

Leverage your corporate security infrastructure

Leverage your existing user directories with our Single-Sign-On SAML integration. We support SAML 2.0 and ADFS 2 for streamlined integrations with cloud SSO providers.

Easy deployment using an industry standard virtual machine

Conceptboard On-Premise is fully supported with regular product updates and enhancements, 24/7/365 access to our Help Center, tutorials, and user on-boarding support.
